DETAILED ACTION

1. This action is in response to the amendment filed on July 29, 2008. Claims 1-3, 5-12, 14-21, and 23-27 are pending and have been considered below.

Allowable Subject Matter

2. Claims 1-3, 5-12, 14-21, and 23-27 are allowed.

3. The following is an examiner's statement of reasons for allowance: The Prior art of record discloses an automatic gain control circuit receiving plurality of frames with plurality of blocks, the system is capable of detecting whether a block in the frame is in a discontinuous transmission mode or not, if the signal is in discontinuous mode the gain value is kept according to the previous signal that was not in discontinuous mode and otherwise adjust the automatic gain control value accordingly. The cited prior art references fails to disclose that the discontinuous transmission mode determination is based on computing a first number of valid frames belonged to the first signal block and comparing first value with a predefined value, if first value is larger or equal to predefined value means first signal is not in the discontinuous mode and vice versa. Also it would not have been obvious to a person of ordinary skill in the art to determine the discontinuous mode for adjusting the gain value by computing a first number of valid frames from the first signal block and comparing first value with a predefined value, if first value is larger or equal to predefined value means first signal is not in the discontinuous mode.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
